EXPERIMENT NO : 5

Name: SABITHA R ROLL NO:240701448

Create a task analysis for an app and document user flows Create corresponding wireframes

USER FLOWS :

Steps of User Flow :

1. Start

The process begins when the user starts the application.

2. Open App

The user opens the food ordering application on their mobile device.

3. Login / Sign Up

The user must log in to their account.
If they are a new user, they can create a new account using **Sign Up**.

4. Home Page

After successful login, the user is directed to the **Home Page** where all food options and categories are available.

5. Search Food or Select Category

The user can search for a specific food item or browse different food categories such as snacks, meals, drinks, etc.

6. View Food Items

The system displays the list of available food items with details like name, price, and description.

7. Select Food Item

The user selects the food item they want to order.

8. Add Food to Cart

After selecting the item, the user adds it to the **shopping cart**.

9. View Cart

The user opens the cart to check the selected food items.

10. Modify Quantity

If needed, the user can increase or decrease the quantity of items in the cart.

11. View Total Amount

The system calculates and shows the **total price** of all items in the cart.

12. Checkout

The user proceeds to checkout to place the order.

13. Payment Page

The system redirects the user to the payment page.

14. Choose Payment Method

The user selects a payment method such as **UPI, card, or cashless payment**.

15. Confirm Payment

The user confirms the payment to complete the order.

16. Order Successful

After successful payment, the system confirms that the order has been placed successfully.

17. End

The process ends after the order confirmation is displayed.
