EXPERIMENT : 9

NAME : SABITHA R

ROLL NO : 240701448

Design input forms that validate data (e.g., email, phone number) and display error messages using HTML/CSS, JavaScript

Step 1: HTML Form (Structure Only)

Code:

```
<!DOCTYPE html>
<html>
<head>
   <title>Hospital Appointment Form</title>
</head>
<body>

<h2>Hospital Appointment Form</h2>

<form>
   <label>Patient Name:</label><br>
   <input type="text"><br><br>

   <label>Email:</label><br>
   <input type="text"><br><br>

   <label>Phone Number:</label><br>
   <input type="text"><br><br>
```

```
    <label>Appointment Date:</label><br>
    <input type="date"><br><br>

    <label>Doctor Name:</label><br>
    <input type="text"><br><br>

    <label>Reason:</label><br>
    <textarea></textarea><br><br>

    <button type="submit">Book Appointment</button>
</form>

<p></p>

</body>
</html>
```

Output (Step 1):

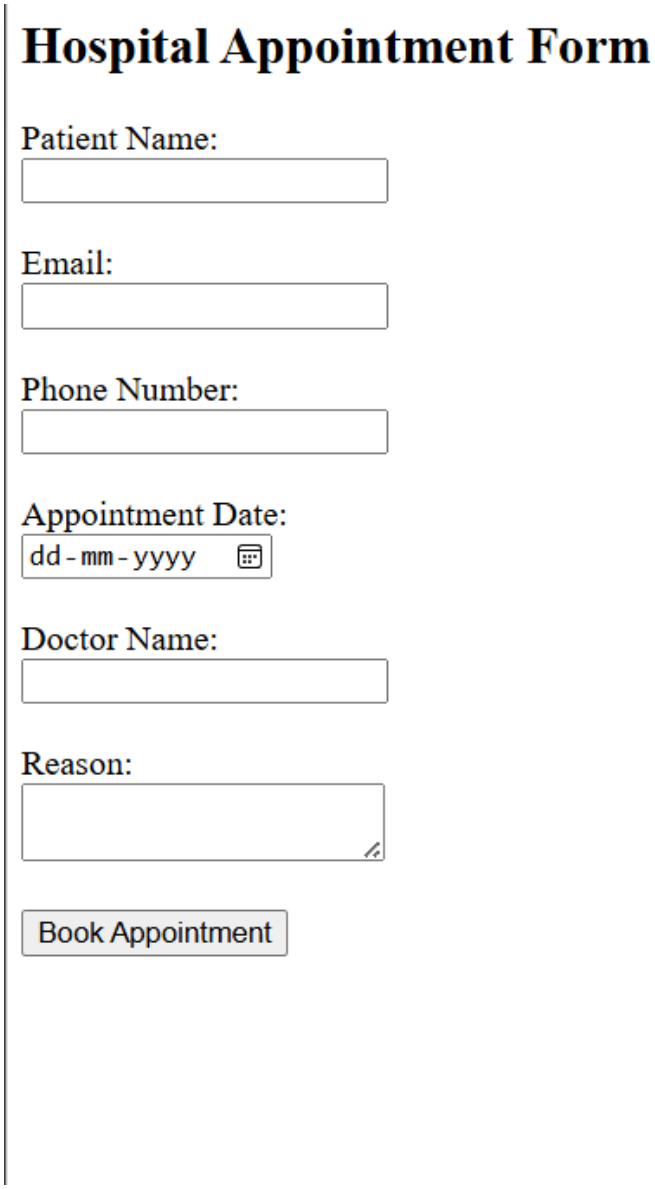
- A basic hospital appointment form is displayed.Contains fields for patient name, email, phone number, date, doctor name, and reason.A submit button is available.No styling and no validation.

Explanation:

- HTML is used to create the structure of the form.

- <form> collects user input.
- <input> fields are used to enter data.
- <textarea> is used to enter the reason.
- <button> is used to submit the form.
- At this stage, the form does not validate inputs.

OUTPUT:



Step 2: HTML + CSS (Structure + Design)

Code:

```
<!DOCTYPE html>
<html>
<head>
    <title>Hospital Appointment Form</title>

    <style>
        body {
            font-family: Arial;
            background-color: #f2f2f2;
        }

        form {
            background: white;
            padding: 20px;
            width: 350px;
            margin: auto;
        }

        input, textarea {
            width: 100%;
            padding: 8px;
        }

        button {
            background-color: blue;
```

```
            color: white;
            padding: 10px;
        }
    </style>
</head>

<body>

<h2>Hospital Appointment Form</h2>

<form>
    <label>Patient Name:</label><br>
    <input type="text"><br><br>

    <label>Email:</label><br>
    <input type="text"><br><br>

    <label>Phone Number:</label><br>
    <input type="text"><br><br>

    <label>Appointment Date:</label><br>
    <input type="date"><br><br>

    <label>Doctor Name:</label><br>
    <input type="text"><br><br>
```

```
    <label>Reason:</label><br>
    <textarea></textarea><br><br>

    <button type="submit">Book Appointment</button>
</form>

<p></p>

</body>
</html>
```

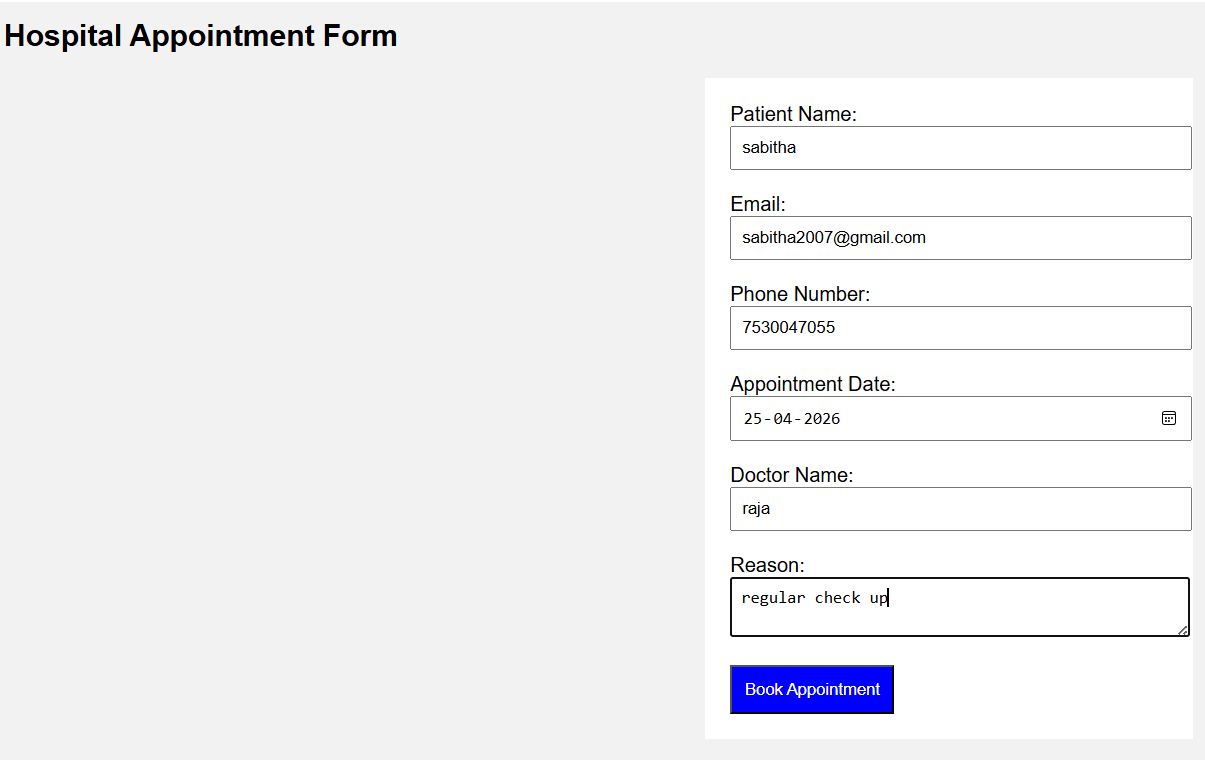
Output (Step 2):

- The form is centered on the page.Background is light grey.Form appears in a white box.Button is styled in blue color. Still no validation.

Explanation:

- CSS is used to improve the appearance of the form.
- background-color sets page color.
- margin: auto centers the form.
- padding adds spacing.
- Improves UI but does not validate data.

OUTPUT:



Step 3: HTML + CSS + JavaScript (Validation)

Code:

```
<!DOCTYPE html>
<html>
<head>
    <title>Hospital Appointment Form</title>

    <style>
        body {
            font-family: Arial;
            background-color: #f2f2f2;
        }

        form {
```

```
            background: white;
            padding: 20px;
            width: 350px;
            margin: auto;
        }

        input, textarea {
            width: 100%;
            padding: 8px;
        }

        button {
            background-color: blue;
            color: white;
            padding: 10px;
        }
    </style>
</head>

<body>

<h2>Hospital Appointment Form</h2>

<form id="appForm">
    <label>Patient Name:</label><br>
    <input type="text" id="name"><br><br>
```

```
    <label>Email:</label><br>
    <input type="text" id="email"><br><br>

    <label>Phone Number:</label><br>
    <input type="text" id="phone"><br><br>

    <label>Appointment Date:</label><br>
    <input type="date" id="date"><br><br>

    <label>Doctor Name:</label><br>
    <input type="text" id="doctor"><br><br>

    <label>Reason:</label><br>
    <textarea id="reason"></textarea><br><br>

    <button type="submit">Book Appointment</button>
</form>

<p id="error" style="color:red;"></p>

<script
src="https://cdnjs.cloudflare.com/ajax/libs/validator/13.9.0/validator.min.j
s"></script>

<script>
```

```
document.getElementById("appForm").addEventListener("submit",
function(e) {
    e.preventDefault();

    let name = document.getElementById("name").value;
    let email = document.getElementById("email").value;
    let phone = document.getElementById("phone").value;
    let date = document.getElementById("date").value;
    let doctor = document.getElementById("doctor").value;
    let reason = document.getElementById("reason").value;

    let error = document.getElementById("error");

    error.innerHTML = "";

    if (name === "") {
        error.innerHTML = "Patient name is required!";
        return;
    }

    if (!validator.isEmail(email)) {
        error.innerHTML = "Invalid Email!";
        return;
    }

    if (!validator.isMobilePhone(phone, 'any')) {
```

```
        error.innerHTML = "Invalid Phone Number!";
        return;
    }

    if (date === "") {
        error.innerHTML = "Please select appointment date!";
        return;
    }

    if (doctor === "") {
        error.innerHTML = "Doctor name is required!";
        return;
    }

    if (reason === "") {
        error.innerHTML = "Please enter reason!";
        return;
    }

    error.style.color = "green";
    error.innerHTML = "Appointment Booked Successfully!";
});
</script>

</body>
</html>
```

Output (Step 3):

Shows error messages for invalid input.Prevents submission if fields are empty or incorrect.Displays success message if all inputs are valid.

Explanation:

- JavaScript validates user inputs.
- Checks each field using conditions.
- Uses validator.js for email and phone validation.
- Displays messages using innerHTML.
- Prevents page reload using preventDefault().

OUTPUT:

Hospital Appointment Form

Patient Name:

sabitha

Email:

sabitha2007@gmail.com

Phone Number:

7530047055

Appointment Date:

25-04-2026

Doctor Name:

RAJA

Reason:

for regular check up

Book Appointment

Appointment Booked Successfully!
